

How we see it....

- 25 years ago land sold in good faith to protect the environment
- You failed to properly resource the call to action
- You failed to meet your self imposed deadline for consultation last spring
- Consultees weren't challenged enough on call for sites (KCC/DFT)
- Ward Councilors not even aware until February
- Initial assessment on constraints/impact/sustainability ruled it out
- Kept in the make up the numbers
- You're being driven by expediency not efficiency and effectiveness
- Flagrant misuse of public money to include a site that's not fit for purpose

Impact on us

- Anger
- Mistrust
- Lack of credibility
- Lack of corporate integrity - pulling the wool over the Planning Inspector's eyes
- Passing the problem to us to fight
- Dipping into our pockets to fight the proposal
- Dipping into Council Tax pot to implement the consultation
- Destroying the property market

What do we want

- Get the process underway without further delay
- Don't let it run longer than statutory period
- Examine new sites in parallel
- Get us out in the summer – don't let it drag on until final submission at the end of the year
