

## CLIMATE LOCAL SEVENOAKS (KEY TARGETS)

2013/14

---

We will work towards a cut in emissions which will contribute to an overall reduction of 34% in Kent's emissions
We will encourage renewable energy installations and want to see the District increase its energy from renewable sources by 10% by 2020
We will work towards retrofitting of homes across the District, beginning with 67 households in 2013 through the work of the Kent and Medway Green Deal Partnership
We will work with at least 42 local companies by 2015 to help them cut their energy, waste and water bills. We will give them guidance on how climate change could affect their company and they can plan for it
We will support activity to reduce water consumption in the District from 160 litres to 140 litres per person per day by 2016
We will ensure that 60% of the District's wildlife sites are being positively managed
We will work to ensure that 95% of the District's Sites on Special Scientific Interest (SSSIs) are in 'favourable' state or 'recovering'
We will encourage an increase in volunteering with a target of a 20% increase in hours spent and a 20% increase in Sevenoaks' residents taking part in organised outdoor activities
We will increase flooding resilience in the District's homes and work with partners to bring in partnership funding for flood measures
We will assess all our services for risks and opportunities and build resilience to climate change into our work

Adoption	17 December 2013
Progress Report One	November 2014
Progress Report Two	November 2015
