

**BS 5837: TREE CATEGORY GUIDE**  
 Category U: Unsuitable for retention, trees with less than 10 years life expectancy.  
 Category A: high quality trees, able to make a substantial contribution for at least 40 years, normally retained unless there is an over-riding reason for removal and appropriate mitigation.  
 Category B: moderate quality trees, able to make a significant contribution for at least 20 years, normally retained.  
 Category B/C: an intermediate category between categories B and C (not specifically described in BS5837). Trees, which should be retained wherever possible, providing retention does not significantly constrain the layout.  
 Category C: low quality, in adequate condition to remain for at least 10 years, or young trees <150mm stem diameter. Trees which can be removed to allow the desired layout or new planting.

**Key**

- Category U
- Category A
- Category B
- Category C
- Crown spread: retained trees
- Trees For Removal
- Root Protection Area
