

Item 11 - Dunbrik Depot Refurbishment & Development Programme

The attached report was considered by the Cleaner & Greener Advisory Committee on 19 April 2022. The relevant Minute extract is below.

Dunbrik Depot Refurbishment & Development Programme (19 April 2022, Minute 44)

The Head of Direct Services presented the report which updated Members on the refurbishment and re-development plans for the Council's main Dunbrik Depot.

The continued development and refurbishment of the Dunbrik depot was vital to improving internal infrastructure, and modernising staffing facilities to ensure the depot was fit for purpose and future proofed for essential statutory front line services.

The proposed refurbishment and development would also free up further space required for any future infrastructure development, such as electric vehicle charging.

Members discussed the report.

Resolved: that it be recommended to Cabinet to endorse the Dunbrik development Plan.
