

## **Item 10 - Contaminated Land Strategy 2022-27**

The attached report was considered by the Cleaner & Greener Advisory Committee on 28 June 2022. The relevant Minute extract is below.

### **Cleaner & Greener Advisory Committee (28 June 2022, Minute 9)**

The Environmental Protection Team Leader presented the report which proposed that Cabinet adopt an updated Contaminated Land Strategy. The revised strategy identified that the Development Control Process had been instrumental in the remediation of many sites and would be encompassed within the Strategy. This strategy proposed this method of discharging the statutory duty primarily by the development control processes.

The strategy had been circulated throughout the Council departments and the Environment Agency and all were happy with its content.

Officers confirmed that the original strategy identified one site which required remediation. This work was completed some time ago and the site record removed. There were no sites at the time in the contaminated land register.

The register was usually considered within the planning process hence it had been included in the strategy.

Resolved: That it be recommended to Cabinet that it be recommended to Council that the Contaminated Land Strategy, be adopted.
